Late Cretaceous, 165
Likelihood, 463
Lithologic succession, 477
Log-survivor function, 463
- Macroscopic cylindrical folds, 549
Magmatic rocks, 349
Main-bird series, 417
Mapping, 375
Marine cycles, 511
Markov chains, 477, 478, 529, 597
- Mathematical analysis, 635
Mathematical geology, 3, 7
Mathematical model, 434, 549
Mathematics, 243, 305, 657, 663
Maximum likelihood estimate, 555
Measure of contiguity, 89
Mineral variation, 561
Mineralization, 669
Mining, 627
Minres factor analysis, 395
Modeling, 43, 505, 577, 651
Mohorovicic discontinuity, 369
Momentum balance equations, 305
Morphogenesis, 649
Mudcracks, 617
Multimodal distributions, 267
Multivariate correlation analysis, 57
Mutually exciting process, 463, 466
- Nain anorthosite complex, Labrador, 561
Neymann-Scott model, 466
Normal geochemical law, 349
Normalizing data, 575
Nuées ardentes, 651
Numerical analysis, 43, 243, 305, 477, 627
Numerical strain, 183
Numerical taxonomy, 9, 113
- Oceanography, 57, 511, 635
Ontario, Canada, 395
Ontogeny, 165
Operational file, 386
Optimal search grids, 323
Optimizing techniques, 77
Optimum sample size, 575
Ordination analysis, 283
Orientation data, 4, 9, 549
- Paleoecology, 137, 151
Paleontology, 113, 151, 183
Paleozoic succession, 480
Patterned ground, 617
Petrology, 25, 561, 669
Phosphate deposits, 219
Plane nets, 617
Planktonic foraminifer, 165
Plotting, 375
Point-block covariance, 627

- Point processes, 95, 463
Polar coordinate transformation, 183
Porgy data, 276
Power-spectrum analysis, 151, 463
Principal components analysis, 25, 57, 113, 165, 635
Probability, 429, 477
Probability of finding deposits, 323
- Random crack networks, 617
Random sampling number experiments, 38
Random variables, 446
Regression analysis, 561, 578
Response models, 4
Rubin-Friedmann cluster analysis, 113
- Scandinavia, 165
Seawater intrusion, 52
Sedimentary environmental analysis, 283
Sedimentary phosphate deposits, 219
Sedimentology, 57, 75, 97, 267, 283, 477, 529, 637, 649
Self-exciting models, 466
Shape variation, 165
Similarity coefficients, 499
Simulation, 37, 43, 219
Singleton coal measures, 533
Smoothing, 243
South Africa, 417
South China Sea, 58
South Oyster Bay, New York, 283
Species diversity studies, 575
Stationary random functions, 627
Statistics, 4, 9, 267, 349, 463, 549, 627
Steady-state mechanisms, 657
- Stochastic models, 4, 598
Strathcona Mine, 395
Stratigraphy, 375
Structure, 9, 83, 375, 549, 649
Sunda Shelf Sea, 61
Suspended sediment, 57
Systems analysis, 477, 511
- Teaching mathematical geology, 331
Temperature, 305
Thom's theorem, 650
Tidal inlet channels, 635
Time-related variability, 113
Time series, 165, 243, 463
Time-trend analysis, 529
Topology, 429, 617, 649, 657
Trace elements, 417
Transition paths, 532
Trend analysis, 561, 568
Turbidites, 652
- Ultrabasic and basic complexes, 669
- Variance-time curve, 463
Varimax rotation, 406
Volcanic ash, 651
Volcanic eruptions, 96
Volcanology, 649
- Well logging, 243
Witwatersrand System, 413
- Yellow Sea, 59

the 1990s, the health care system in the United States has been characterized by a series of reforms. These reforms have been aimed at improving the efficiency of the health care system, reducing costs, and improving the quality of care. The reforms have included changes in the way health care is financed, delivered, and managed.

One of the most significant reforms has been the implementation of managed care. Managed care is a system of health care delivery in which a health plan contracts with a network of providers to deliver care to its members. The health plan is responsible for managing the care of its members, including selecting the providers, negotiating rates, and monitoring the quality of care. Managed care has been widely adopted in the United States, and it has been credited with helping to control costs and improve the quality of care.

Another significant reform has been the implementation of health care reform legislation. In 1993, the Clinton administration passed the Health Insurance Reform Act, which established a new health insurance system for the elderly and disabled. The act also established a new health insurance system for the working poor. The act was a landmark achievement, as it was the first time in the history of the United States that health care was guaranteed for all citizens.

Finally, there have been a number of other reforms, including changes in the way health care is financed, delivered, and managed. These reforms have been aimed at improving the efficiency of the health care system, reducing costs, and improving the quality of care.

Overall, the health care system in the United States has been characterized by a series of reforms. These reforms have been aimed at improving the efficiency of the health care system, reducing costs, and improving the quality of care. The reforms have included changes in the way health care is financed, delivered, and managed.

Journal of the International Association for Mathematical Geology

Volume 8, 1976

Editorial Board

Editor-in-Chief: D. F. Merriam (USA)
Deputy Editor: R. B. McCammon (USA)

Associate Editors:
J. E. Robinson (Canada)
M. A. Romanova (USSR)
W. Schwarzacher (UK)
P. Switzer (USA)

Editorial Correspondents

J. C. Brower (USA)
H. Colin (West Germany)
M. David (Canada)
G. de Marsily (France)
M. Domokos (Hungary)
J. H. Doria-Medina (Bolivia)
M. Dumitriu (Romania)
D. Gill (Israel)
J. C. Gower (UK)
J. W. Harbaugh (USA)
D. M. Hawkins (South Africa)

J. Hruška (Czechoslovakia)
K. R. Johnson (Australia)
P. Landim (Brasil)
B. Malmgren (Sweden)
S. Mizutani (Japan)
R. Potenza (Italy)
S. V. L. N. Rao (India)
W. A. Read (UK)
G. Scott (New Zealand)
R. Ünruğ (Poland)
V. Vuchev (Bulgaria)

Officers and Council Members of the IAMG

President: R. A. Reymont (Sweden)
Past President: A. B. Vistelius (USSR)
Vice President: A. T. Bharucha-Reid (USA)
Secretary General: D. F. Merriam (USA)
Treasurers: J. C. Davis (USA)
V. Neměc (Czechoslovakia)
Editor-in-Chief: D. F. Merriam (USA)

Council Members:
H. A. F. Chaves (Brasil)
A. C. Cook (Australia)
J. E. Klován (Canada)
P. Laffitte (France)
G. Lea (UK)
D. Marsal (West Germany)
E. H. T. Whitten (USA)

Published bimonthly at Osney Mead, Oxford, England, for the International Association for Mathematical Geology by Plenum Publishing Corporation, 227 West 17th Street, New York, N.Y. 10011. In 1976, Volume 8 (6 issues) will be published. Subscription orders should be addressed to the publisher. *Journal of the International Association for Mathematical Geology* is abstracted or indexed in Applied Mechanics Reviews, Engineering Index, Geological Abstracts, Current Contents, and Referativnyi Zhurnal. © 1976 Plenum Publishing Corporation.

Subscription price:

Volume 8, 1976 (6 issues) \$69.50. Price for individual subscribers certifying that the journal is for their personal use, \$22.50. Outside the U.S. add \$2.70 for postage and handling. Prices somewhat higher outside the U.S. A special price is available to members of the Association.

Volume 9, 1977 (6 issues) \$69.50. Outside the U.S. add \$2.70 for postage and handling. Prices somewhat higher outside the U.S. A special price is available to members of the Association.

Second-class postage paid at Jamaica, N.Y. 11431.

Printed in Great Britain.

Contents

Vol. 8, No. 1

February 1976

Mathematical Geology and Development of the Geological Sciences <i>A. B. Vistelius (USSR)</i>	3
Delineation and Analysis of Clusters in Orientation Data <i>R. J. Shanley (USA) and M. A. Mahtab (USA)</i>	9
Principal Components Analysis Using the Hypothetical Closed Array <i>J. C. Butler (USA)</i>	25
Empirical Behavior of Chayes' Null Model <i>E. L. Zodrow (Canada)</i>	37
Finite-Element Method in Modeling Geologic Transport Processes <i>R. T. Cheng (USA) and D. S. Hodge (USA)</i>	43
Multivariate Correlation Analysis of Suspended-Sediment Characteristics <i>S. Yamamoto (USA)</i>	57
Implementation of Criteria for Partitioning a Dendrogram <i>J. D. Orford (UK)</i>	75

SHORT NOTES

Discovery of Deposits of Given Size in Boreholes with Preselected Probability <i>A. M. Shurygin (USSR)</i>	85
Critical Values for a Measure of Contiguity of Anomalous Points in a Grid Survey <i>J. H. Davis (USA)</i>	89
Some Applications of Point Processes to Geology <i>R. Reymont (Sweden)</i>	95

ASSOCIATION ANNOUNCEMENTS

Mining Příbram in Science and Technology 1973, a Review	99
"Mathematics and Computers in Exploration," a Seminar Held in Budapest, Hungary (September, 1974)	100
Seminar on "Mathematical Methods in Geochemical Prospecting" (December, 1973), Sverdlovsk, USSR	102
LETTERS TO THE EDITOR	105
REVIEWS	107

Vol. 8, No. 2

April 1976

Study of Time-Related Variability Within the Genus <i>Astarte</i> (Bivalvia): A Multivariate Approach <i>F. Symons (Belgium) and A. Ringele (Belgium)</i>	113
Binary Coefficients: A Theoretical and Empirical Study <i>M. E. Hohn (USA)</i>	137
Fourier Analysis of Bivalve Outlines: Implications on Evolution and Autecology <i>J. L. Gevirtz (USA)</i>	151
Size and Shape Variation in the Planktonic Foraminifer <i>Heterohelix</i> <i>striata</i> (Late Cretaceous, Southern Scandinavia) <i>B. A. Malmgren (Sweden)</i>	165
Numerical Strain Analysis Using Polar Coordinate Transformations <i>V. Hirsinger (Australia)</i>	183

ASSOCIATION ANNOUNCEMENTS

Seminar on "Methodology of Geological Research" Held at Khabarovsk, USSR, November 1974	203
Conference on "Application of Mathematical Methods and Computers for Solving Problems in Geology" Held at Novosibirsk, USSR, May 1975	206

LETTER TO THE EDITOR	209
